Ag Equipment Intelligence

July 2015 Dealer Sentiments & Business Conditions Update

Monthly Ag Equipment Intelligence North American Dealer Survey

Background:

- We are pleased to announce the results of the July Ag Equipment Intelligence survey conducted in partnership with Cleveland Research Company. We hope this monthly survey will provide valuable and timely insight into industry trends and fundamentals.
- The July survey had 81 respondents representing combined annual revenues of roughly \$3.5 billion. Participants representing a broad cross section of geographies and brands are summarized in the charts below.

Appalachia – KY, NC, TN, VA, WV, Corn Belt – IL, IN, IA, MO, OH, Delta States – AR, MO, LA, Lake States – MI, MN, WI, Mountain – AZ, CO, ID, MT, NM, NV, UT, WY, Northeast – CT, DE, ME, MD, MA, NH, NY, NJ, PA, RI, VT, Northern Plains – KS, NE, ND, SD, Pacific – CA, OR, WA, AK, HI, Southeast – AL, FL, GA, SC, MS, Southern Plains – OK, TX. Note AGCO represents Massey Ferguson and Challenger brands.

Highlights / Summary Thoughts

- Sales Average dealer sales were reported down 13% y/y in June, inline with the 13% average decline dealers reported in May. A net 10% of dealers missed their sales budget in June, making for the fifth consecutive month of net budget misses. Hay Equipment and Commercial and consumer lawn equipment remains the only areas of strength, while most large equipment demand remains very weak.
- Orders –Orders were reported down 17% y/y on average in June, inline with the 17% decline reported last month but a notable deterioration from the first quarter pace.
- Outlook The full year dealer average sales growth forecast remains unchanged at down 15% for the year, with a net 37% of dealers forecasting a sales decline for the year, similar to the May survey results.
- **Inventory** A net 37% of dealers report new equipment inventories are too high, inline with the April survey and remaining at the high end of our survey history. Used inventories appear to have deteriorated in June, with 40% of dealers reporting inventory was too high vs. 34% in May.
- **Pricing** Dealers have reported a 1-1.5% uptick in new equipment price realization in the last three months due to Tier 4 sales and OEM price push. Used large tractor pricing is reported down 4% on average, inline with the May survey results, while utility tractor remains flat y/y. Used combine prices remain weak at down 8% on average, deteriorating from a 7% decline reported last month.

Monthly Sales Growth

- Average dealer sales were reported down 13% y/y in June, inline with the 13% average decline dealers reported in May. A net 10% of dealers missed their sales budget in June with over 30% reporting worse than expected sales.
- A net 18% of dealers report they are less optimistic about overall business conditions, the 15th consecutive month of deterioration in optimism.

Monthly Sales Growth by Region

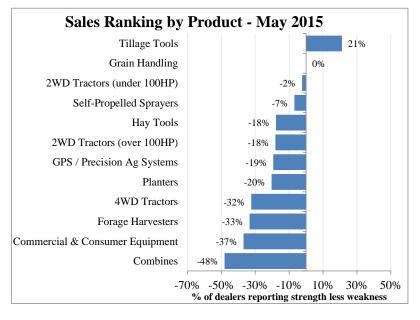

• Sales trends remain varied by geography, with weak sales growth rates persisting across much of the lake states, corn belt, and mountain regions in June. Sales growth showed improvement in the Delta States compared to May.

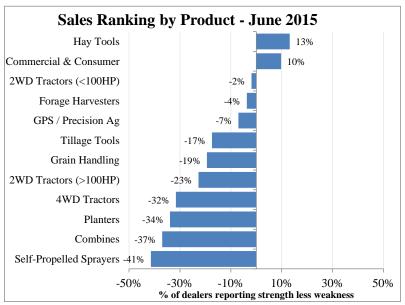

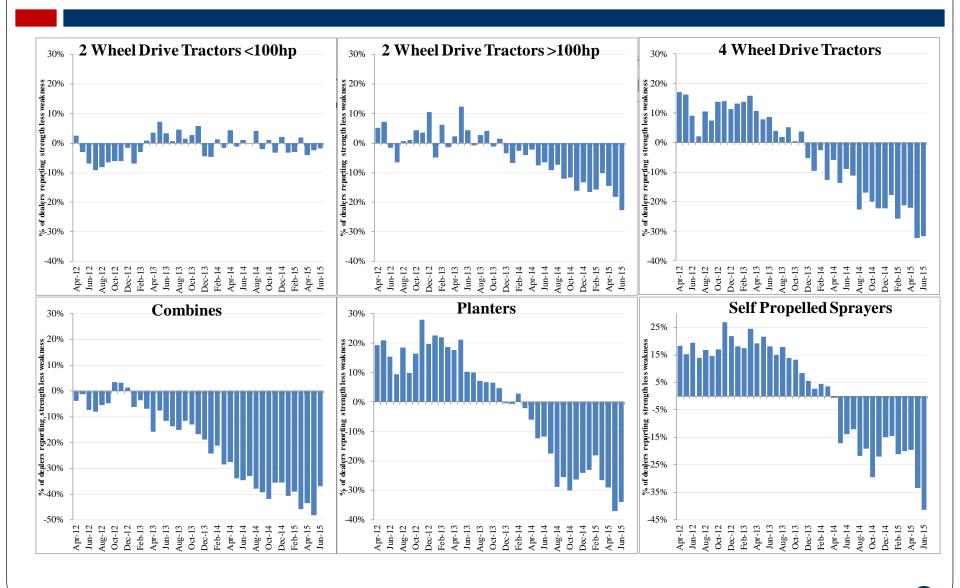

Equipment Category Sales Trends

• Hay tools saw strengthening demand, with a net 13% of dealers reporting higher sales in this category in June, one of the highest levels in survey history. Commercial & consumer lawn equipment remains a strong category, while most other product categories continue to show very weak demand trends (sprayers, combines, and planters in particular)

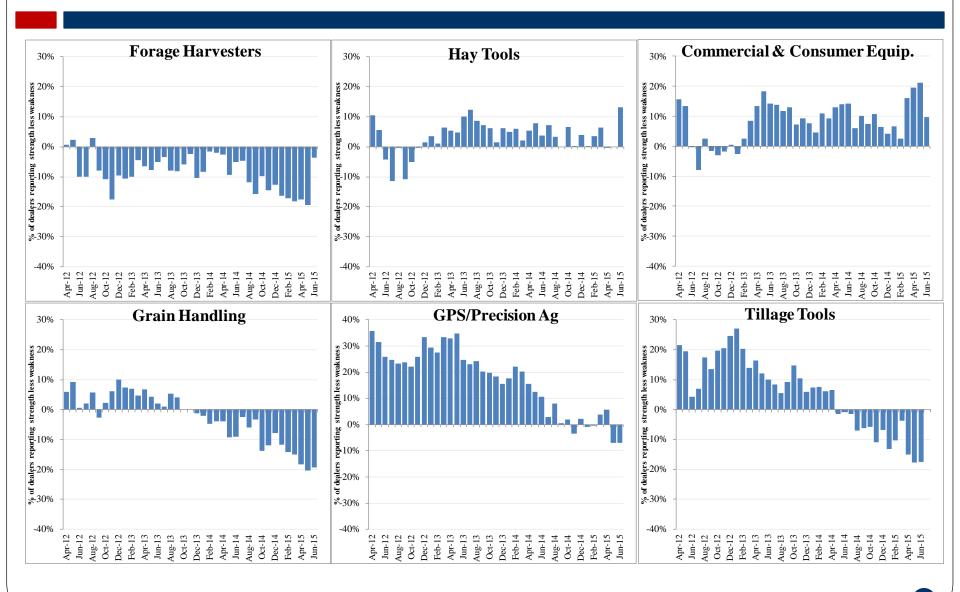

Equipment Category Sales Trends

Equipment Category Sales Trends (Continued)

Most Interesting Commentary - Monthly Sales and Outlook

- Farmers are extremely tight now, the only bright spot is corn. Low prices have farmers down and uninterested in new. Any of their trades are virtually at junk prices.
- The only thing that sells product is a low or zero interest lease, or 0% financing. We haven't quoted a single MUD deal so far.
- Too much rain, not enough heat.
- Excess rain led to little hay getting harvested.
- Enthusiasm remains for class 4 and 5 combines.
- Manufacturers are shipping anything you order, they're running scared.
- The market for 5000 hour, 150-200hp, 10-20 year old tractors remains stable.
- Most of the compact and small ag items are open orders, without caps or targets by manufacturers as of mid-June.

Monthly Order Trends

- Orders were reported down 17% y/y on average in June, inline with the 17% decline reported in May but a notable deterioration from the first quarter pace. Kubota dealers reported the smallest order decline at 4%, while Case IH had the largest order decline at 25% of the major OEMs.
- Combine orders remain weak, but show improvement over previous trends with 11% of dealers reporting higher new combines orders in June, and 60% ordering fewer combines. This net 48% is the lowest decline seen since a June 2014.

Order Trends by Region

• The Pacific Northwest and Delta States regions remain relatively strong compared to the Corn Belt region, which continues to report +20% order declines.

Average Dealer Sales Outlook

- The full year dealer average sales growth forecast remains unchanged at down 15% for the year, with a net 37% of dealers forecasting a sales decline for the year, a 3% decline from May survey results. Kubota dealers, notably, forecast positive sales for the year.
- The second table below details the industry outlooks from Deere, Case IH/New Holland and AGCO.

2015 Sales Outlook Continued

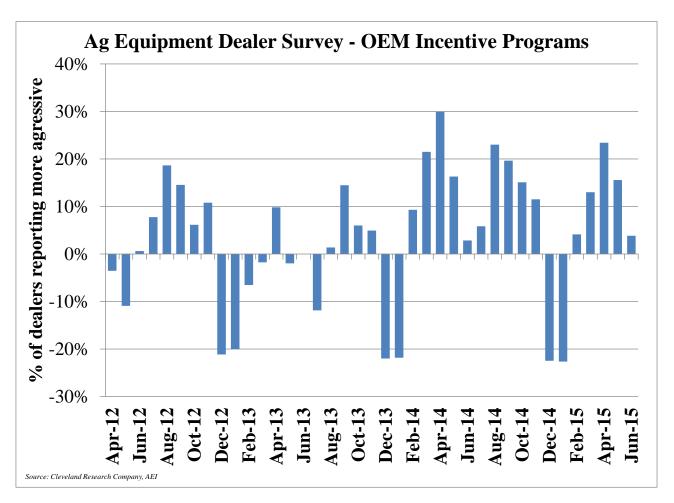

• The 2015 sales forecast remains mixed by region, with the Delta States and Pacific Northwest expecting to show growth for the year, while Appalachia, the Corn Belt, and the Lake States are anticipating a decline of ~25%.

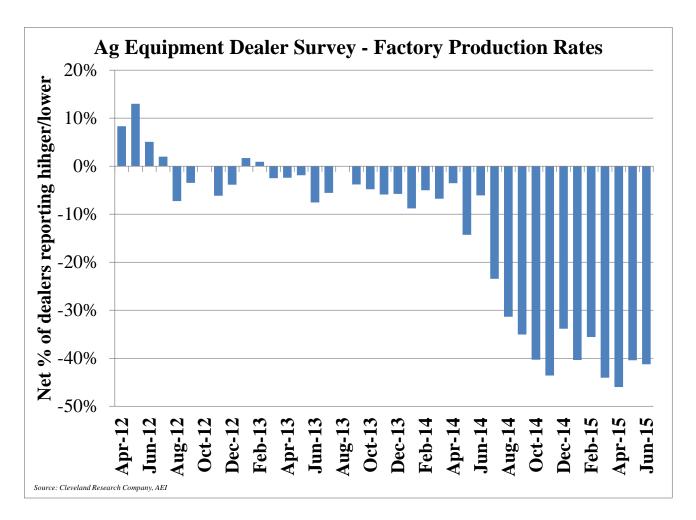

Current Manufacturer Incentive Programs

• OEM incentive programs were reported by dealers to be slightly more aggressive again in June by a net 4% of dealers vs a net 16% of dealers in May.

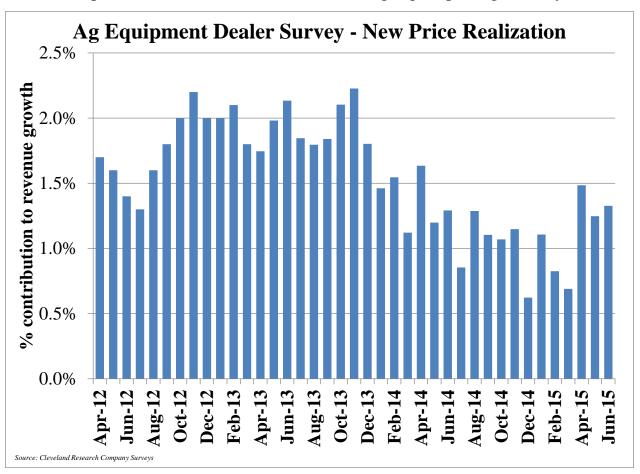

Factory Production

• A net 41% of dealers report OEM production rates are declining, similar to the last several month trend.

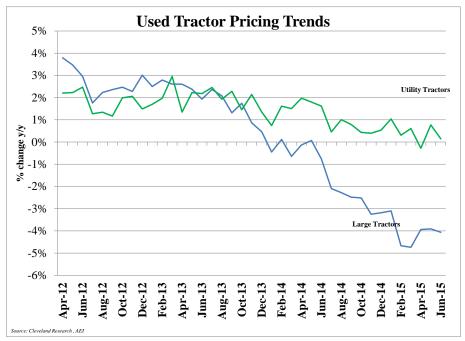

Pricing Trends

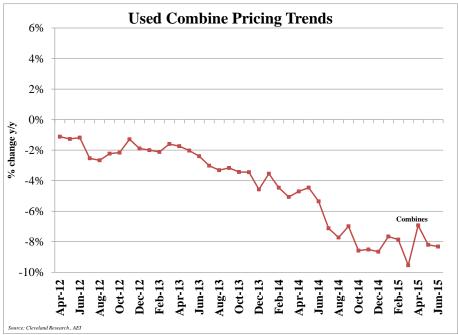

• Dealers report several OEMs pushed through small price increases in recent months, which pushed up the average new equipment price realization across the dealer sample to 1-1.5% over the last three months. Tier 4 final emissions related price increases are also noted as driving higher pricing recently.

Used Equipment Pricing

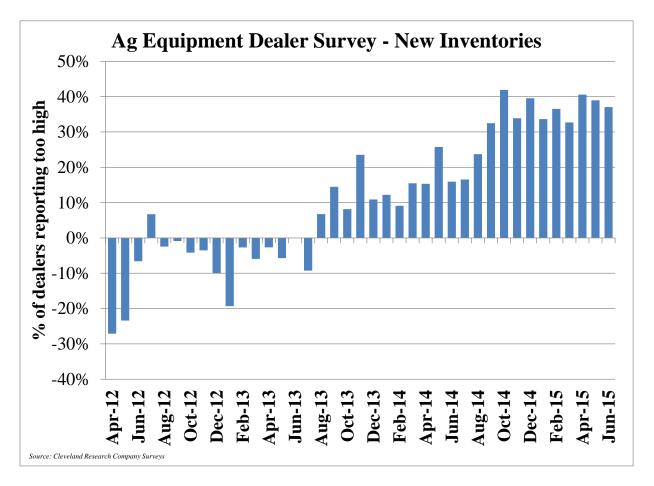

- Used large tractor pricing is reported down 4% on average, inline with the May survey results, while utility tractor used pricing remain flat y/y.
- Used combine prices remain weak at down 8% on average, inline with the decline reported last month.

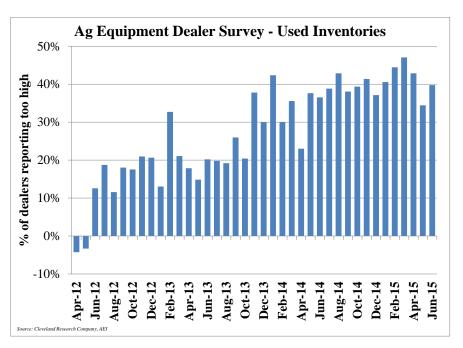

New Equipment Inventory Levels

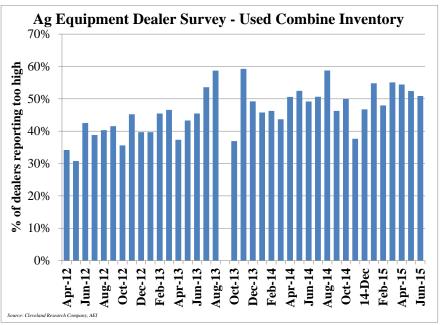

• A net 37% of dealers report new equipment inventories are too high, a slight improvement over the May survey, but remaining at the high end of our survey history.

Used Equipment Inventory Levels

- Used equipment inventories have deteriorated in June, with 40% of dealers reporting inventory was too high vs 34% in May. Anecdotally, many dealers report their efforts to sell used inventory instead of new has been helpful in recent months, but inventories are still too heavy in specific product categories.
- The used combine inventory remains too high with over a net 50% of dealers reporting inventories are above where they would like them.

Annual Agricultural Equipment Industry Sales (1985 - 2014)

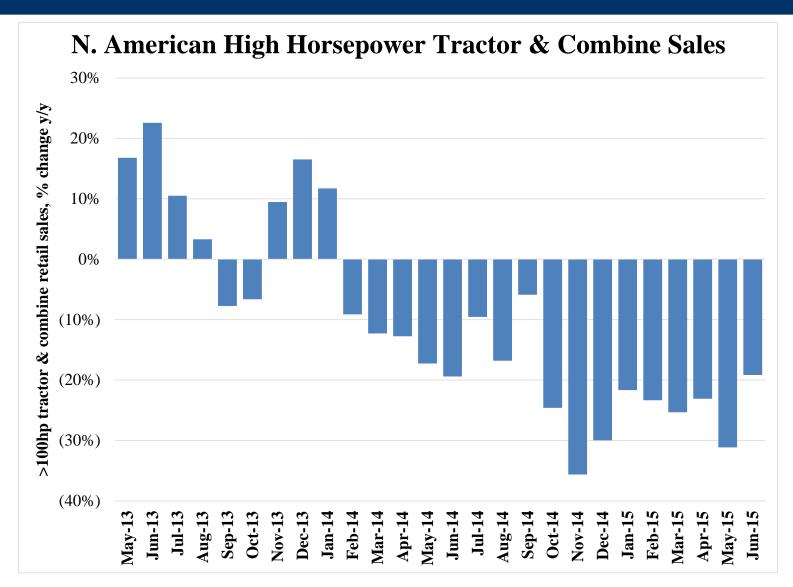

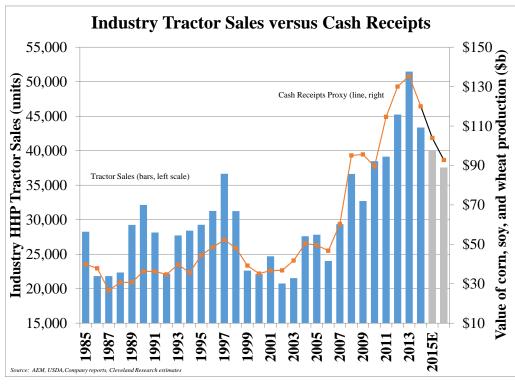

North America Large Ag Equipment Sales

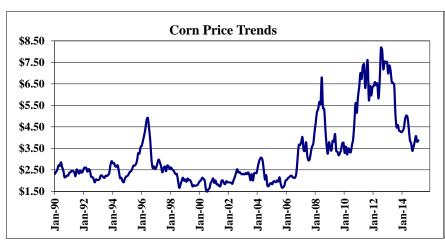

Commodity Prices – Cash Receipts vs. Next Year Equipment Sales

USDA's July WASDE Update Highlights – The following chart illustrates the historical relationship between the value of production of corn, soybeans, and wheat in the U.S. compared to annual industry sales of high horsepower tractors.

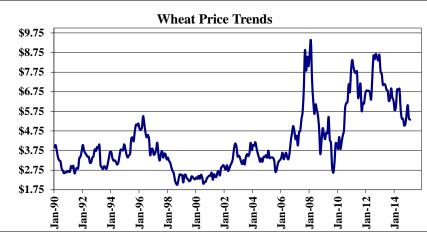

USDA's July crop report was positive for future industry tractor sales, with USDA raising its forecast season average price forecast for corn/soy/wheat by 6% to reflect stronger future prices recently, and lowering its corn and soybean production forecasts by 1-2%. Our cash receipts proxy now forecasts receipts down 6% y/y in 2015/2016 compared to the June forecast of down 11% and the 2014/2015 decline of 13%.
