

Ag Equipment Intelligence

October 2015 Dealer Sentiments &
Business Conditions Update

Monthly Ag Equipment Intelligence North American Dealer Survey

Background:

- We are pleased to announce the results of the October *Ag Equipment Intelligence* survey conducted in partnership with Cleveland Research Company. We hope this monthly survey will provide valuable and timely insight into industry trends and fundamentals.
- The September survey had 132 respondents representing combined annual revenues of roughly \$5.7 billion. Participants representing a broad cross section of geographies and brands are summarized in the charts below.

Survey Participants by Region

Participants by Brand

Appalachia / Northeast – CT, DE, KY, MA, MD, ME, NC, NH, NY, NJ, PA, RI, TI, TN, VA, VT, WV, **Corn Belt** – IL, IN, IA, MO, OH, **Delta States / Southeast / Southern Plains** – AL, AR, FL, GA, LA, MS, OK, SC, TX, **Lake States / Northern Plains** – KS, MI, MN, NE, ND, SD, WI, **Mountain / Pacific** – AK, AZ, CA, CO, HI, ID, MT, NM, NV, OR, UT, WA, WY. Note AGCO represents Massey Ferguson and Challenger brands. *Note regions have been condensed.

Highlights / Summary Thoughts

- **Sales** – Average dealer sales were reported down 16% in September, roughly inline with the 15% decline reported in September. A net 9% of dealers missed their sales budget in September, making for the eighth consecutive month of net budget misses. Commercial and consumer lawn equipment sales continue to show strength, while most large equipment demand remains very weak.
- **Outlook** – The full year dealer average sales growth forecast increased to down 14% for the year from forecasts of down 15% last month, with a net 35% of dealers forecasting a sales decline for the year, inline with August.
- **Inventory** – A net 38% of dealers reported new equipment inventories as too high, a decline from a net 35% in August. Used inventory levels improved with 33% of dealers reporting inventory as too high vs. 42% in August.
- **Pricing** – Dealers have reported a ~1-1.5% uptick in new equipment price realization in the last six months due to Tier 4 sales and OEM price pushes that have come through recently. Used large tractor pricing is reported down 7% on average, a step down from August, while small tractor pricing actually increased 2%. Used combine prices deteriorated further to down 15% in September vs a 9% decline in August.

Monthly Sales Growth

- Average dealer sales were reported down 16% y/y in September, a 1% deterioration from September's down 15% cadence. 3Q was down 16% vs. down 12% in 2Q. A net 8% of dealers missed their sales budgets in September with over 25% reporting worse than expected sales.
- A net 24% of dealers report they are less optimistic about overall business conditions, the 18th consecutive month of deterioration in optimism.

Monthly Sales Growth by Region

- Sales trends remain weak across geographies, but relative changes have been mixed. Canada, Lake States/Northern Plains and the Corn Belt are the weakest regions. The Mountain/Pacific region remains the strongest comparatively and has moved into positive territory.
- The Delta States/Southeast/Southern Plains region showed the largest improvement in September, reaching positive sales growth after several months of double-digit declines.

Average Sales Growth by Region August 2015

Average Sales Growth by Region September 2015

Equipment Category Sales Trends

- Commercial & consumer lawn equipment continues to show strength in contrast to declines in other categories (combines, planters and sprayers in particular). Almost every category showed a relative deterioration from prior month trend, with the exception of grain handling and hay tools. We continue to see headwinds to large equipment sales.

Equipment Category Sales Trends

Equipment Category Sales Trends (Continued)

Most Interesting Commentary - Monthly Sales and Outlook

- *Farmer sentiment has remained very cautious, they are watching their expenses closely. Those that are looking for trade-ins walk away disheartened with the value of used equipment.*
- *Case IH keeps decreasing the pre-selling programs, contributing to the high cost of new machinery. How do they expect us to generate more orders when they're cutting programs?*
- *OEM doesn't seem interested in selling new equipment based on their current 2016 pre-sell program.*
- *Kubota is priced very competitively, I continue to see them taking business from us.*
- *I was disappointed by the AGCOs discounting programs, they were not aggressive. I hope they don't wait until December to decide that they aren't meeting expectations and then throw us extra discounts.*
- *Under 100 hp and cattle related equipment sales continue to do well, while anything over 100 hp is dead.*
- *We had an excellent harvest with good weather and strong yields. Used combine sales were about non-existent. Interest continues to center around lower dollar item goods (<\$50,000).*
- *All our new equipment sales remain on low ticket items.*
- *The general economic malaise continues to pressure new and used equipment sales.*
- *The recent drop in cattle prices has me less optimistic on the year.*
- *A lot of dairy farmers seem to be on hold with making purchases.*
- *September and October have traditionally been strong months for us, and so far they have been soft.*
- *Large ag products are sitting around. The next-in-line guys aren't jumping off the fence to buy, because they are having difficulty securing funding or the products in stock are too large for their needs.*
- *The late model used epidemic is being compounded by an abundance of lease returns.*
- *There is a growing delta between our used sales numbers and our used inventory numbers.*
- *I'm concerned that when we clean out this old inventory the new equipment will be too high in the clouds for customers to actually afford.*

Average Dealer Sales Outlook

- The full year dealer average sales growth forecast improved slightly in September to down 14% for the year from down 15% in August. A net 35% of dealers are forecasting a sales decline for the year, inline with the forecast in August.
- Initial 2016 average dealer sales forecasts are for a 6% decline, an improvement from the 9% estimate last month. A net 22% of dealers are forecasting a sales decline for the year.
- The second table below details the industry outlooks from Deere, Case IH/New Holland and AGCO.

Asia	Down Modestly	Tractors (10-15%), Combines (15-20%)	na

Source: Company reports, CRC estimates

2015 Sales Outlook Continued

- The Mountain/Pacific region are showed relative strength, expecting slight growth for the year. The Lake States/Northern Plains region continues to forecast greater than 20% declines y/y. The corn belt's 2015 outlook notably improved from near 25% decline forecasts to a decline of ~10%.

Pricing Trends

- Dealers report several OEMs pushed through small price increases in recent months, which has modestly raised average new equipment price realization ~1-1.5% across the sample. Increases at other OEMs are set to occur on Nov. 1 with expectations of equally moderate pricing realization. The effect of the strong U.S. dollar on Canadian exchange rate has, also, played a part in price inflation within North America.

Used Equipment Pricing

- To provide better insight within the used tractor market we have added additional layers of granularity.
- September saw a 2% y/y increase in both compact and utility tractors. Large tractors were reported down 7% y/y on average, a step-down vs. August's decline of 4%. Used combine prices, also, showed a further deterioration, declining 15% y/y in September vs. down 9% in August.
- We increased our pricing bucket range this month to accommodate a high volume of responses in the max pricing decline bucket.

Used Tractor and Combine Equipment Values					
	Compact (<40HP)	Utility (40-100HP)	Row Crop (100HP+)	4WD	Combines
Sep-15	2%	2%	-4%	-9%	-15%

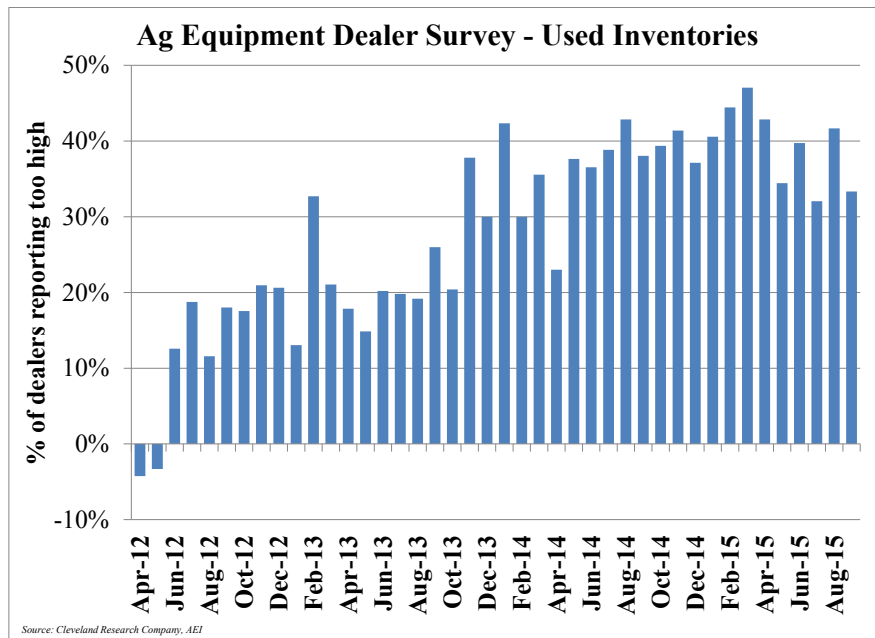

New Equipment Inventory Levels

- A net 38% of dealers reported new equipment inventories are too high vs. 35% in August. This marks 13 months of new inventory levels reported as too high by more than a net 30% of dealers.

Used Equipment Inventory Levels

- A net 33% of dealers reported used equipment inventory as too high vs. 42% in August.
- The used combine inventory remains too high with a net 25% of dealers reporting inventories above where they would like them. However, this was the most favorable level seen in 2015 and anecdotally continues to be a key focus area for dealers.

Annual Agricultural Equipment Industry Sales (1985 - 2014)

North America Large Ag Equipment Sales

Commodity Prices – Cash Receipts vs. Next Year Equipment Sales

USDA's October WASDE Update Highlights – The following chart illustrates the historical relationship between the value of production of corn, soybeans, and wheat in the U.S. compared to annual industry sales of high horsepower tractors.

USDA's October crop report remained negative for future industry tractor sales, and was a slight deterioration from the September report. The USDA raised its forecast season average corn price forecast by 1% to reflect lower planted acres. Soybean price forecasts held steady. Our cash receipts proxy now forecasts receipts down 7% y/y in 2015/2016 compared to the September forecast of down 6% and the 2014/2015 decline of 13%.
