

Technology Should Be Your Ally Not Your Limitation

Our mission is to empower your business with technology that drives growth and efficiency. **Ready to take your business to the next level? Let's connect!**

Basic Software Systems is a leading provider of business management software and solutions throughout the United States, Canada and much more!

Our Business System offers a versatile solution, offering numerous modules that can be installed individually or integrated as a complete Business System, such as Accounts Payable (AP), Customer Profile Manager/Receivables (AR), Auction Management, Equipment (Wholegoods) Inventory, Fixed Assets, General Ledger (GL), Internet Price Book Download, Parts Inventory, Payroll, Point-of-Sale (POS) Invoicing, Rental Management, and Service Shop Management.

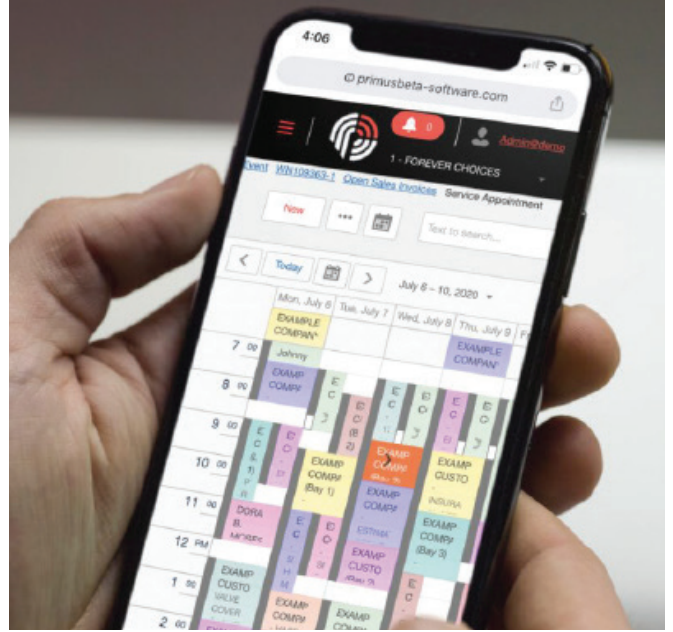

"Primus meets today's demands for remote productivity without the constraints of cumbersome connectivity. Your business system will be at your fingertips in full functionality at all times."

Paula McGuire, President/CEO

Take Action NOW and Bring Your Business System With You 24/7

We have a long standing partnership with Manufacturers such as New Holland®, Case®, Kubota®, and John Deere® which enables our Business System to integrate with many Manufacturer Interfaces like Equipment Locator Service, IRON Solutions, Farm Plan, ProQuest Business Solutions, Inc., ARI PartSmart™, PAL™, and Kubota EPC. In the event, though, that we do not currently offer a Manufacturer Interface that you need, our programmers can customize one for you!

Minimize Complexity. Maximize Efficiency

Running your business efficiently is tough when you rely on multiple tools and limited connectivity. We've worked tirelessly to solve this problem for you with Primus.

Connectivity

Constant connection without being connected to the office. The connection liberty will be a game changer in your engagement and connection with your departments and company as a whole.

Scheduling

Scheduling On-the-Go. Know what is going on at all times with a schedule that is in your pocket and ready for reference or updating at any time.

Invoicing & Reporting

Sell, quote and forecast anytime. Anywhere. Imagine having your forecast and your bottom line at your fingertips at all times.

Inventory Control

Real-time inventory at your fingertips. Need to see what you have on-hand in a pinch? No problem.

Work Orders

Service with ease. Service your customers with a quicker efficiency from start to finish.

Status Updates

Update customers on their status. Keep your customers up-to-date with a customized status update system.

Accounting

Real-time accounting. Efficient accounting in real-time with full audit capabilities allowing for up-to-date forecasting.
